

How do we unit test with the
ExceptionHandler Service in ngMock?

\$exceptionHandler

Any uncaught exception in Angular expressions is delegated to this service.

Core Angular Service

\$exceptionHandler

Mock implementation of \$exceptionHandler
that rethrows or logs errors passed to it.

ngMock Version

\$exceptionHandlerProvider

Handling Modes

Log

- Catches the error and stores it in an array.

Rethrow

- Rethrows the error as a standard exception.

\$exceptionHandlerProvider

Handling Modes

```
beforeEach(module(function($exceptionHandlerProvider) {  
    $exceptionHandlerProvider.mode('log');  
  
    /* OR */  
  
    $exceptionHandlerProvider.mode('rethrow');  
}));
```
